MD ESMAIL HOSSEN

Software Engineer - Crypto-native builder - Dhaka, Bangladesh

Email: fancyarcadia@gmail.com | Portfolio: github.com/fancyarcadia/crypto-earnings-pipeline

PROFESSIONAL SUMMARY

Software engineer with hands-on experience building automation, APIs, and developer tooling. Recently focused on blockchain/web3 workflows: designing an automated crypto-earning pipeline (bounty monitoring, GitHub automation, multi-chain payouts). Comfortable across the full stack of a small project - from scripting and integration to documentation and reporting. Remote-ready, detail-oriented, and fluent in English.

TECHNICAL SKILLS

- Languages/Stack: JavaScript/TypeScript, Node.js, HTML/CSS, Bash/Shell
- APIs & Integration: REST APIs, GitHub API, webhooks, MCP-based tooling
- Automation: scripting, daemon processes, data pipelines
- Blockchain/Web3: wallets & multi-chain operations (Solana, Base, Ethereum), stablecoins (USDC/USDT), on-chain data reading
- AI-assisted workflow: drafting, review, documentation, process automation
- Tools: Git/GitHub, VS Code, Markdown, CSV/JSON, Google Docs, Linux

PROJECTS

Crypto Earnings Pipeline - Independent Project (2026)

- Built an automated system that polls GitHub for newly posted rewarded bounties and alerts within minutes
- Auto-claims eligible tasks and prepares pull requests via the GitHub API
- Tracks payouts across wallets with a ledger and automated weekly reports
- Security best practices: scoped tokens, locked local keys, no secret leakage
